

NORMAL

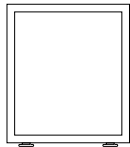

www.bulbo.com

First, there was Quasi Normal, the desk that Jean Nouvel designed for Bulo as part of the Carte Blanche series. To the architect, "Quasi Normal" or nearly normal is his most direct way of creating a product that expresses his imagination and sensuality; The functional aspects however are not always approached in the most rational way.

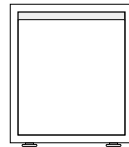

Normal on the other hand, re-establishes the balance between emotion and reason. Jean Nouvel provides a contemporary interpretation of management furniture: serene proportions and materials that appeal to the senses.

BL04

Range composition

Desk - consists of 3 elements: a work top supported by one drawer unit and one credenza

Storage units - 4 different types (low or high, 4 or 6 doors)

Meeting tables - in 3 sizes

The complete range is available in 4 different finishes: padouk(*) or oak veneer and HPL white or black.

(*) African padouk is a long lasting wood variety, which has an orange/red color. As it is the case with other veneers, the color pales when exposed to light. BULO can not be held responsible for these color differences.

Desk

The rectangular worktop is supported by 2 volumes, of which one is turned 90°. One volume functions as a drawer unit and is accessible from the back as well as from the front. The drawer unit turned 90° is functioning as a credenza and has two lateral doors. The worktop is connected to both volumes by 2 starshaped elements.

Worktop

Dimensions: W 2600 x D 1050 x H 750 mm. The edges of the 45 mm thick work top are made of strips in massive wood (ash). The crosscut of the hardboard sheet right underneath the veneer remains visible. Two openings (to transit the wire) on strategic places are covered with the same type of finish as the work top.

Wiring

Two steel starshaped elements contain the vertical wiring conduction and data plug to the electrification space at the back of the drawer unit and the credenza. The sockets, data plug and wiring can be reached via the openings in the worktop. Underneath the worktop there is a cable channel interconnecting both stars and providing horizontal wiring guidance (between both openings, between both drawer unit and credenza). The back compartment of the drawer unit, accessible through a hinged door, is serving as wiring space. The starshaped element also has an external wiring guidance enabling the power supply of peripherals on the drawer unit tops.

Drawer unit

W 513 x D 1078 x H 580. The drawer unit is accessible from the front and the back side. Both front and back sides of the carcass have a frame in massive wood.

The drawer unit has 2 separate compartments:

a) the front space is the drawer unit and has many lay out possibilities:

- 1 pull-out shelf and 2 small drawers
- 1 pull-out shelf and 1 large drawer
- 1 small and 1 large drawer
- 1 hinged door (incl. 1 shelf)(for housing a CPU)

The pull-out shelf has a border in massive wood and also has the hardboard detail. The drawers have no handles. The rear space has a door and is designed to be used as electrification space (plug socket, connection to computer floor and bottom panel). The panel separating both spaces enables cable transit between the two compartments.

Finish - Padouk or oak veneer carcass / massive borders in padouk/oak

- White or black HPL carcass/massive borders ash.

Credenza unit

W 1078 x D 513 x H 580.

Same dimensions and exterior aspect as the drawer unit. The credenza has two lateral doors, that hinge on a panel separating two compartments of the same size. The borders in massive wood have glass or veneer panels. Each compartment is standard equipped with a glass shelf.

Finish - see drawer unit:

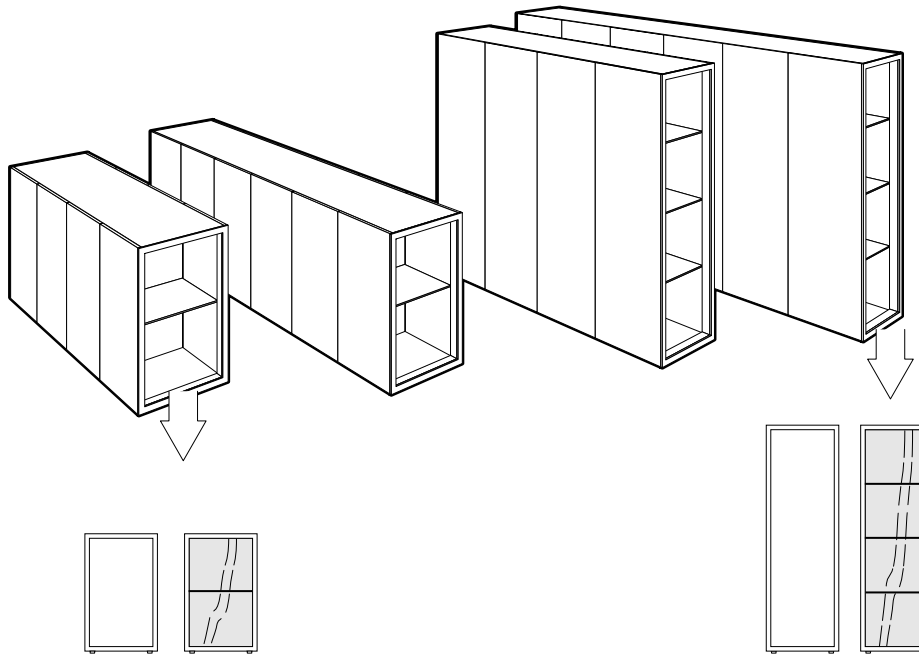

- red transparent glass for padouk and black HPL
- blue transparent glass for oak and white HPL.

JN VTR016

Storage units

4 different types:

- low credenza, available with 4 or 6 doors
- high storage unit, available with 4 or 6 doors

Every storage unit has a central part with two hinged doors and on both sides half a storage unit with 1 hinged door at the front and at the back. A 6 doors storage unit has 2 central parts. The back of the storage units is identical to the front, thus enabling the storage unit to stand independently in a room. The sides have a border in massive wood and a panel in veneer or in coloured transparent glass.

Technical details

2 heights: 835 or 1603 mm

2 widths: 1811 mm (4 doors) or 2705 mm (6 doors),

All storage units are 513 mm deep.

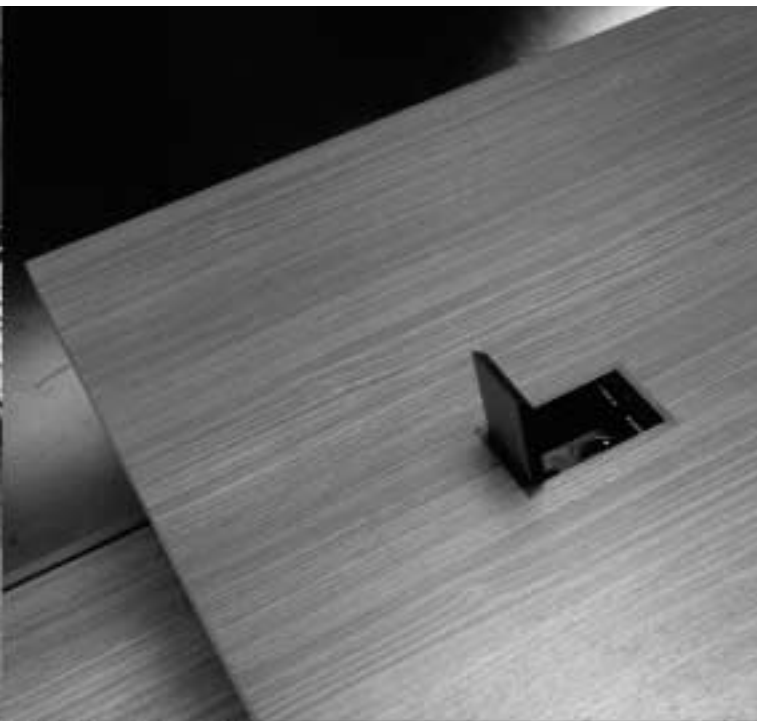

Meeting tables

Different sizes:

- rectangular 2600 x 1050 mm
- round diameter 1600 mm
- round diameter 1200 mm

The table tops have the same finish and the same details as the desktops. The round tables are supported by one column leg on a round base. The rectangular one is supported by 2 column legs. All parts are powder coated, metallic anthracite.

Wiring - The round meeting tables can be equipped (not standard) with one type of cable transit (similar to the one used in the desks). The rectangular tables are standard equipped with a cable transit. The column leg provides the vertical cable management.
